Discovery Phase Deliverable — April 2026

OVERVIEW

200+

User Stories

13

Modules

11

User Roles

Story Format:

As a [User Role], I want to [action], so that [benefit]

Each story is specific, actionable, and tied to business value. Stories are organized by user role within each module for clear understanding of who needs what functionality.

Representative sample shown in this deck; full backing set maintained in User-Stories/Detailed/ (13 module docx files).

USER PERSONAS — 11 ROLES

Super Admin

System administrator managing tenant config, users, and integrations

HR Manager

HR leadership overseeing strategy, compliance, and operations

HR Specialist

HR professional handling day-to-day transactions and processes

Client Admin

Client-side IT admin managing their tenant and user access

Employee

Individual contributor accessing self-service HR features

Manager/Dept Head

Line manager handling team approvals and performance

Finance/Payroll Officer

Finance team processing payroll, tax, and benefits

Recruiter

Talent acquisition managing job postings and candidate pipeline

Trainer/L&D Specialist

Learning & development designing and delivering training

Contractor

External worker managing contracts and timesheets

Auditor/Compliance Officer

Compliance professional ensuring regulatory adherence

M1: Core HRIS — USER STORIES

Employee

As an Employee, I want to view my complete employee record (personal, employment, compensation), so that I can verify my information is accurate and up-to-date.

As an Employee, I want to update my personal information (phone, address, emergency contacts), so that HR has my current details.

As an Employee, I want to view my organizational reporting structure and team members, so that I understand my place in the company hierarchy.

HR Manager

As an HR Manager, I want to search and filter employees by department, location, and role, so that I can quickly find and analyze specific employee groups.

As an HR Manager, I want to bulk import employees from CSV/Excel with mapping configuration, so that I can efficiently onboard large groups.

As an HR Manager, I want to create and manage custom employee fields (certifications, skills, languages), so that I can capture organization-specific attributes.

As an HR Manager, I want to view the complete organizational chart with drill-down capability, so that I understand reporting relationships.

As an HR Manager, I want to manage employee documents (contracts, offer letters, policy acknowledgments) with version tracking, so that I maintain a comprehensive file.

As an HR Manager, I want to access audit logs showing all changes to employee records with timestamps and user attribution, so that I can ensure compliance and accountability.

As an HR Manager, I want to export employee data in multiple formats (PDF, Excel, CSV), so that I can share or archive information.

M1: Core HRIS — USER STORIES

HR Specialist

As an HR Specialist, I want to create and maintain employee records with all required fields, so that I have a complete employee database.

As an HR Specialist, I want to manage employment contracts with signature workflows, so that I maintain legal compliance.

As an HR Specialist, I want to track employment status changes (active, on leave, terminated) with effective dates, so that records reflect current state.

Manager/Dept Head

As a Manager, I want to view my team members' key information (names, roles, locations), so that I can manage my team effectively.

As a Manager, I want to approve employee information changes, so that HR maintains data accuracy.

Super Admin

As a Super Admin, I want to configure required fields and custom attributes for the organization, so that the system captures necessary data.

As a Super Admin, I want to manage data retention policies, so that the system complies with legal requirements.

M2: Recruitment — USER STORIES

Recruiter

- As a Recruiter, I want to create job requisitions with budget tracking, so that I manage hiring requests effectively.
- As a Recruiter, I want to post jobs to multiple channels (internal, external, job boards), so that I reach diverse talent pools.
- As a Recruiter, I want to screen resumes using AI-powered keyword matching and ranking, so that I prioritize qualified candidates.
- As a Recruiter, I want to maintain a talent pool with persistent candidate profiles and availability tracking, so that I can quickly fill future roles.
- As a Recruiter, I want to schedule interviews with calendar integration and video meeting links, so that I streamline interview logistics.
- As a Recruiter, I want to collaborate with hiring managers using structured feedback forms, so that we align on candidate fit.
- As a Recruiter, I want to generate offer letters with templated terms, so that I accelerate hiring close.

HR Manager

- As an HR Manager, I want to approve job requisitions and track hiring budget, so that I control costs.
- As an HR Manager, I want to view recruitment pipeline analytics (conversion rates, time-to-hire), so that I identify bottlenecks.
- As an HR Manager, I want to set diversity hiring goals and track representation, so that I ensure inclusive recruitment.
- As an HR Manager, I want to access historical requisition data, so that I plan future hiring strategies.

M2: Recruitment — USER STORIES

Manager/Dept Head

As a Manager, I want to request new headcount with business justification, so that HR prioritizes hiring.

As a Manager, I want to review and rate candidates during interviews, so that I contribute to hiring decisions.

As a Manager, I want to see candidate background checks and reference checks, so that I verify fit before offer.

Candidate

As a Candidate, I want to apply for jobs and track my application status, so that I know where I stand in the process.

As a Candidate, I want to complete assessments and surveys as part of the interview, so that I demonstrate my capabilities.

M3: Onboarding — USER STORIES

HR Specialist

As an HR Specialist, I want to create onboarding checklists for new hires with role-based task templates, so that I ensure nothing is missed.

As an HR Specialist, I want to assign pre-boarding tasks to new hires (complete forms, sign documents), so that they start prepared.

As an HR Specialist, I want to track offboarding checklists (system access, equipment return, knowledge transfer), so that exits are clean.

As an HR Specialist, I want to send automated document requests to new hires, so that I reduce manual follow-up.

Employee

As an Employee, I want to receive pre-boarding information and complete required forms before my start date, so that I'm prepared.

As an Employee, I want to access onboarding resources (benefits guides, org charts, policies), so that I integrate quickly.

As an Employee, I want to complete my profile with direct deposit and beneficiary information during onboarding, so that payroll is accurate.

Manager/Dept Head

As a Manager, I want to receive notification when a team member is hired, so that I can prepare for their arrival.

As a Manager, I want to assign a mentor to new hires, so that they have support and guidance.

As a Manager, I want to offboard my team members with a structured handover checklist, so that work transitions smoothly.

Super Admin

As a Super Admin, I want to provision system access automatically upon hire, so that new employees can work immediately.

As a Super Admin, I want to deactivate system access and retrieve equipment upon termination, so that security is maintained.

M4: Performance — USER STORIES

Employee

As an Employee, I want to set SMART goals aligned with organizational strategy, so that I understand expectations.

As an Employee, I want to receive 360-degree feedback from peers and managers, so that I get comprehensive perspectives.

As an Employee, I want to participate in self-assessments during performance reviews, so that my voice is heard.

As an Employee, I want to view my development plan and track progress on skills, so that I grow in my role.

As an Employee, I want to document achievements throughout the year, so that I have evidence for review discussions.

M4: Performance — USER STORIES

Manager/Dept Head

As a Manager, I want to set team goals and cascade them from organizational OKRs, so that alignment is clear.

As a Manager, I want to conduct mid-year and annual reviews with structured templates, so that feedback is consistent.

As a Manager, I want to participate in calibration sessions to ensure fair ratings across the team, so that compensation decisions are equitable.

As a Manager, I want to create development plans with training recommendations, so that I invest in my team's growth.

As a Manager, I want to identify high performers and succession candidates, so that I support retention and promotion.

HR Manager

As an HR Manager, I want to manage the performance review cycle with timeline and task assignment, so that reviews happen on schedule.

As an HR Manager, I want to view performance analytics (rating distribution, cycle completion rates), so that I ensure process compliance.

As an HR Manager, I want to track performance history by individual and cohort, so that I identify patterns and trends.

As an HR Manager, I want to configure review cycles, templates, and rating scales, so that the process fits the organization.

M5: Training — USER STORIES

Trainer/L&D Specialist

As a Trainer, I want to create courses with multimedia content (videos, documents, quizzes), so that I deliver engaging learning.

As a Trainer, I want to design learning paths that sequence courses for skills development, so that employees progress logically.

As a Trainer, I want to assign mandatory compliance training to specific roles or locations, so that I ensure regulatory adherence.

As a Trainer, I want to create and track certifications with expiration dates, so that I ensure current qualifications.

As a Trainer, I want to view completion analytics by employee and cohort, so that I measure training effectiveness.

Employee

As an Employee, I want to browse available courses and enroll in relevant learning, so that I develop skills.

As an Employee, I want to complete courses and track my progress, so that I know what I've learned.

As an Employee, I want to receive notifications about mandatory training due dates, so that I stay compliant.

As an Employee, I want to download certificates upon course completion, so that I have proof of learning.

Manager/Dept Head

As a Manager, I want to recommend courses to my team members, so that I guide their development.

As a Manager, I want to view team training completion status, so that I ensure compliance.

M6: Payroll — USER STORIES

Finance/Payroll Officer

As a Payroll Officer, I want to configure salary structures (base, allowances, deductions) for each employee, so that payroll is accurate.

As a Payroll Officer, I want to process payroll in bulk with validation checks, so that I minimize errors.

As a Payroll Officer, I want to manage tax calculations (income tax, social insurance) with Egyptian compliance, so that I meet legal obligations.

As a Payroll Officer, I want to generate payslips with itemized deductions and net pay, so that employees understand compensation.

As a Payroll Officer, I want to track accrued leave balances and integrate with leave approvals, so that I account for leave costs.

As a Payroll Officer, I want to manage salary reviews and increments with effective date tracking, so that compensation changes apply correctly.

As a Payroll Officer, I want to generate tax reports and social insurance submissions, so that I meet regulatory deadlines.

As a Payroll Officer, I want to audit payroll runs with detailed logs showing all calculations, so that I ensure accuracy and compliance.

Employee

As an Employee, I want to view my payslip online with gross, deductions, and net pay, so that I understand my compensation.

As an Employee, I want to download payslips for tax filing, so that I have required documentation.

As an Employee, I want to view my year-to-date earnings and tax withholding, so that I plan financially.

As an Employee, I want to get support for payroll questions with self-service FAQ, so that I don't need to contact HR.

M6: Payroll — USER STORIES

HR Manager

As an HR Manager, I want to approve salary changes and track compensation decisions, so that I maintain equity and budget control.

As an HR Manager, I want to view payroll reports by department and cost center, so that I analyze labor costs.

As an HR Manager, I want to configure payroll cycles and tax rules, so that the system processes correctly.

Super Admin

As a Super Admin, I want to set up payroll bank integration for automated fund transfers, so that payments are reliable.

As a Super Admin, I want to configure Egyptian tax tables and social insurance rates, so that the system stays compliant.

M7: Benefits — USER STORIES

Employee

As an Employee, I want to view available benefits (health, retirement, insurance) with coverage details, so that I understand options.

As an Employee, I want to enroll in benefits during open enrollment with decision support, so that I select appropriate coverage.

As an Employee, I want to make mid-year changes (life events), so that my coverage stays current.

As an Employee, I want to view my benefits status and coverage documents, so that I have easy reference.

As an Employee, I want to submit expense claims (medical reimbursement) with receipt uploads, so that I recover costs.

HR Manager

As an HR Manager, I want to configure benefits plans and coverage levels, so that employees have choice.

As an HR Manager, I want to manage open enrollment periods with timeline and communication, so that all employees enroll.

As an HR Manager, I want to track benefits enrollment and expenses by employee, so that I forecast costs.

As an HR Manager, I want to manage reimbursement approvals, so that claims are processed fairly.

Finance/Payroll Officer

As a Payroll Officer, I want to integrate benefits deductions into payroll, so that contributions are accurate.

As a Payroll Officer, I want to reconcile benefits expenses with budget, so that costs are controlled.

M8: Contractors — USER STORIES

HR Specialist

As an HR Specialist, I want to onboard contractors with contract templates and e-signature, so that engagements start legally.

As an HR Specialist, I want to manage contractor compliance (NDA, insurance, references), so that risk is mitigated.

As an HR Specialist, I want to offboard contractors with system access and equipment retrieval, so that exits are controlled.

Contractor

As a Contractor, I want to access a contractor portal for contract details and status, so that I'm informed.

As a Contractor, I want to submit timesheets for approval, so that I get paid accurately.

As a Contractor, I want to submit invoices with project details and supporting documents, so that I track billing.

Finance/Payroll Officer

As a Payroll Officer, I want to approve contractor timesheets and invoices, so that payments are authorized.

As a Payroll Officer, I want to generate 1099/tax statements for contractors, so that I meet reporting requirements.

As a Payroll Officer, I want to track contractor spending by project, so that I control costs.

Manager/Dept Head

As a Manager, I want to request contractor resources with project and budget justification, so that I get approval.

As a Manager, I want to rate contractor performance at project end, so that I provide feedback.

M9: Analytics — USER STORIES

HR Manager

As an HR Manager, I want to view workforce dashboards (headcount, turnover, tenure) with visual analytics, so that I understand key metrics.

As an HR Manager, I want to drill into cohort analysis (by department, location, level), so that I identify trends.

As an HR Manager, I want to generate reports on diversity and inclusion (gender, age, background), so that I track progress toward goals.

As an HR Manager, I want to access predictive analytics (attrition risk, retention factors), so that I take proactive action.

As an HR Manager, I want to forecast workforce demand (staffing needs by role/department), so that I plan hiring.

Finance/Payroll Officer

As a Payroll Officer, I want to view cost analytics (labor costs by department, headcount costs), so that I manage budget.

As a Payroll Officer, I want to compare actual spending vs. budget, so that I flag variances.

Super Admin

As a Super Admin, I want to configure custom dashboards and KPIs, so that analytics align with business priorities.

As a Super Admin, I want to access system performance and usage analytics, so that I monitor platform health.

M10: System Admin — USER STORIES

Super Admin

- As a Super Admin, I want to manage user accounts (create, disable, delete) with bulk operations, so that I control access.
- As a Super Admin, I want to assign roles and permissions with role-based access control (RBAC), so that data is secured.
- As a Super Admin, I want to enable SSO (SAML/OAuth) for seamless login, so that users authenticate securely.
- As a Super Admin, I want to enforce MFA (multi-factor authentication) for sensitive accounts, so that I reduce breach risk.
- As a Super Admin, I want to manage API keys and integrations with external systems, so that data flows securely.
- As a Super Admin, I want to view audit logs with full history (user actions, data changes), so that I ensure accountability.
- As a Super Admin, I want to configure data retention and deletion policies, so that I meet legal requirements.
- As a Super Admin, I want to manage multi-tenant isolation, so that client data remains confidential.

Client Admin

- As a Client Admin, I want to manage my tenant users and permissions, so that I control access in my organization.
- As a Client Admin, I want to configure company-specific settings (branding, policies, workflows), so that the system reflects our culture.

M11: Mobile — USER STORIES

Employee

As an Employee, I want to view my profile and update personal information on mobile, so that I can manage details on the go.

As an Employee, I want to submit and track leave requests from my phone, so that I don't need a computer.

As an Employee, I want to view my payslip and download it as PDF on mobile, so that I have easy access.

As an Employee, I want to view upcoming training and complete courses on mobile, so that I learn anywhere.

As an Employee, I want to submit and track expense reports with photo receipts, so that I claim reimbursements quickly.

As an Employee, I want to receive push notifications for important updates (approvals, reviews, events), so that I stay informed.

Manager/Dept Head

As a Manager, I want to approve leave, expenses, and reviews on mobile, so that I can act promptly.

As a Manager, I want to view my team information on mobile, so that I manage from anywhere.

M12: Client Portal — USER STORIES

Client Admin

As a Client Admin, I want to provision my tenant with company details, branding, and initial configuration, so that we're ready to launch.

As a Client Admin, I want to customize the portal appearance with our logo and colors, so that it feels like our brand.

As a Client Admin, I want to view company dashboards (headcount, payroll spend, utilization), so that I monitor operations.

As a Client Admin, I want to manage HR team users and permissions, so that access is controlled.

As a Client Admin, I want to access support documentation and contact support for help, so that I get assistance quickly.

As a Client Admin, I want to track SLA compliance (support response times), so that I monitor service quality.

Egybell (Provider)

As Egybell, I want to onboard new clients with white-label configuration, so that they launch independently.

As Egybell, I want to manage billing and usage metrics for clients, so that we track revenue and utilization.

As Egybell, I want to monitor client health (system performance, feature adoption), so that I ensure success.

M13: Billing — USER STORIES

Finance/Payroll Officer

As a Finance Officer, I want to track usage metrics (employees, transactions, storage) for billing, so that I calculate costs accurately.

As a Finance Officer, I want to generate invoices for clients based on usage tiers, so that I bill correctly.

As a Finance Officer, I want to track subscription revenue and forecast MRR/ARR, so that I model business performance.

As a Finance Officer, I want to manage billing periods and payment reconciliation, so that cash flow is clear.

Super Admin

As a Super Admin, I want to configure billing models (per-employee, feature-based, tiered), so that pricing aligns with strategy.

As a Super Admin, I want to manage payment methods and autopay, so that billing is automated.

As a Super Admin, I want to access billing audit logs, so that I track all financial transactions.

PRIORITY MATRIX

MUST-HAVE

Phase 1 foundation: Employee records, org chart, user & role management, SSO/MFA, tenant setup, audit logs

SHOULD-HAVE

Phase 2 people modules: Recruitment/ATS, Onboarding, Performance reviews (M2 · M3 · M4)

NICE-TO-HAVE

Phase 3-5 expansion: Payroll, Benefits, LMS, Contractors, Analytics, Mobile, Client Portal, Billing

FUTURE

Post-launch: Advanced ML features, deeper integrations, international expansion, third-party ecosystem

SUMMARY & NEXT STEPS

Key Takeaways:

- ~200 user stories across all personas, workflows, and modules (full set in User-Stories/Detailed/)
- Stories are role-centric, feature-rich, and aligned with modern HR platforms
- Egyptian labor law compliance and multi-tenant capabilities built in
- AI-powered features, mobile support, and self-service for all users
- Clear prioritization separates Phase 1 (must-have) from future phases

Next Steps:

- Stakeholder review and refinement based on feedback
- Technical design and architecture planning for Phase 1
- Sprint planning and capacity allocation for development
- User research sessions to validate assumptions
